SERVICES

Break bulk

SERVICES

Break bulk

When the nature of the cargo, its dimensions or its volume makes you think about the loose cargo mode, we can provide you with a tailored solution.

We are freight forwarders and representatives of first-rate shipping lines. Therefore, we have the experience and capacity to ship and transport all types of cargo, such as crates, large bags, boxes, barrels, etc.

In addition, we specialize in other types of packaging and loose cargo that do not require individual packaging, such as steel, machinery, paper rolls, pipes and any other type of cargo that can be transported as **Break Bulk**.

SERVICES

Break bulk / LO-LO cargo

Boats appropriate for Lo-Lo may transport a great variety and a large volume of cargo, because they are designed and built for such purposes.

Lo-Lo is the abbreviation for "Lift-On / Lift-Off" and it means that the goods are loaded and unloaded by "lifting" them with a crane installed for such purposes on the deck of the vessel.

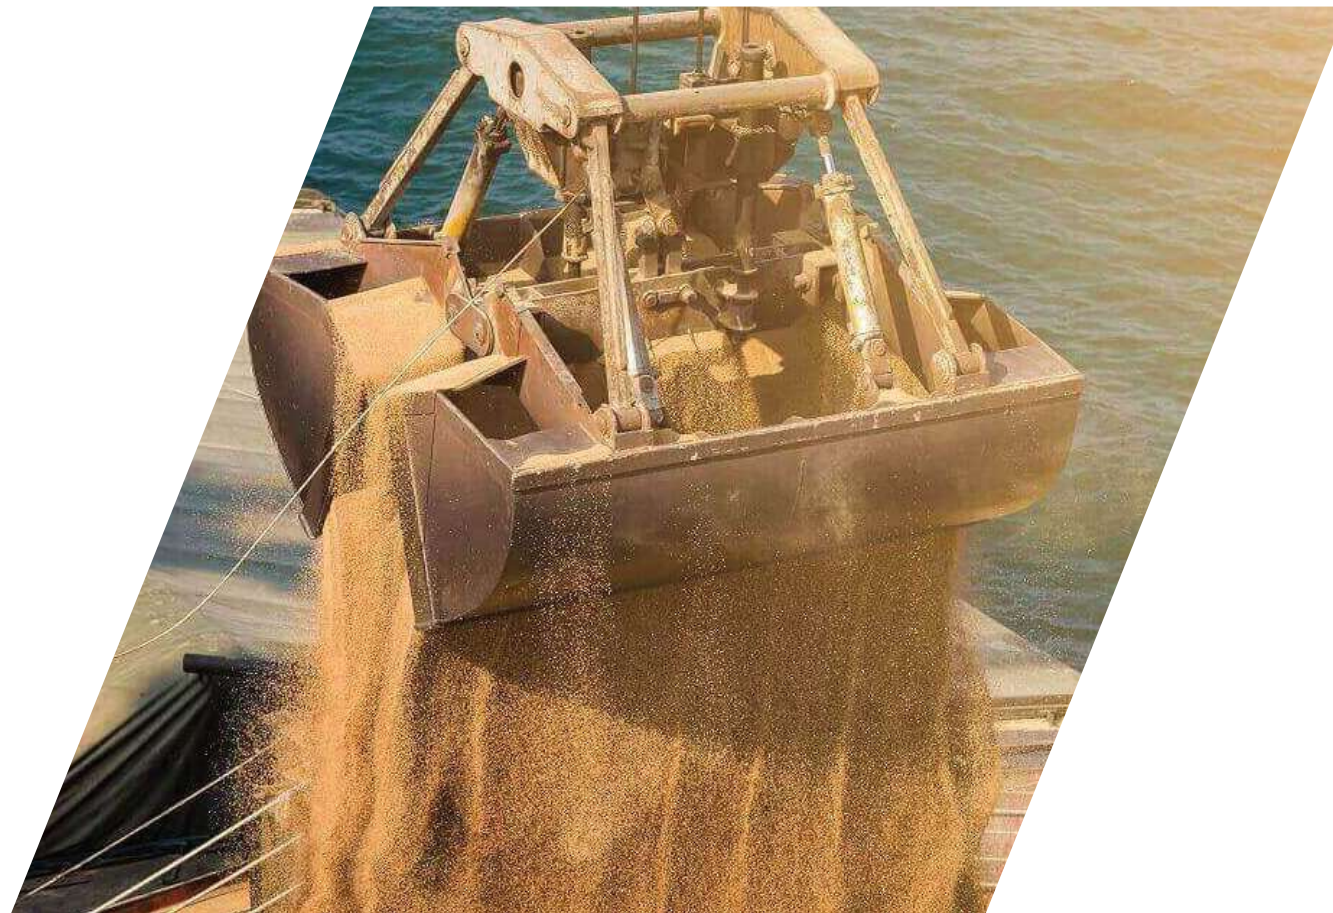

SERVICES

Break bulk / bulk cargo

Products such as grains, coal, chemicals, minerals and fertilizers, among others, are transported in bulk carriers when the loads involve large volumes.

Our experience in the movement of bulk cargo allows us to provide advice and to offer an excellent service. We offer both a competitive business service and real-time operations.

We can load any type of bulk cargo; supplying vessels according to specific customer requirements and adapting to market demands.

SERVICES
Break bulk / RO-RO cargo

→ **RO-RO cargo transport is designed to carry rolling cargo.** It consists of a ramp, either on the ship or on land, which helps to load and unload the goods. This system is designed to accommodate and store cargoes that cannot otherwise be stacked due to the variety of volumes present, as their sizes vary from one to another.

SERVICES

Project cargo

SIZE IS NOT A PROBLEM... We can transport oversized, extra-heavy, high-value, dangerous or delicate cargo; as well as any other which may involve complex and specialized components. We are experts in planning and personalized engineering of transport from the port of loading to the port of discharge, as well as in calling remote ports. We offer a high-quality service in compliance with the highest safety standards, always tending to the needs and requirements of our clients.

LOADING AND DISCHARGING

We load and unload bulk vessels, with the highest safety and environmental protection standards.

These are some of the products we specialize in:

CLEAN BULKS

- Cereals
- Wheat
- Corn
- Soy
- Flour
- Distillates

DIRTY BULKS

- Coke
- Scrap
- Clinker
- Minerals

GENERAL LOAD: We unload and load general cargo ships, with the highest safety and productivity standards, from unloading, carrying, storage and dispatch of cargo, when the operation is unloading and, in the loading operation, from receipt in port until storage, porting, stowage and lashing on board.

SERVICES

Port operation / Carga RO-RO

→ **ROLLING LOAD OPERATION:**

We load and unload ships with rolling cargo where we supply drivers, stevedores, palletists, credit card holders and supervisors. We carry out rolling load operations with the highest standards of safety, efficiency and productivity.

SERVICES

River transport

SERVICES

River transport / Magdalena river

We offer river transport service of oversized, massive cargo, on the Magdalena River, from Barranquilla and Cartagena.

Colombia is one of the countries that have a river highway on the Magdalena River. This allows us to carry out a multimodal transport service to the interior of the country; towards the port of Barrancabermeja.

We operate the following equipment for river traffic, for oversized cargo, heavy cargo and Ro-Ro cargo services:

- Tugboats
- Barges
- Modular ships or convoys.

SERVICES

River transport / Magdalena river

- City
- River and seaport
- Riverport

River

- Barranquilla - Barrancabermeja
- Barrancabermeja - Puerto Berrío
- Puerto Berrío - Puerto Salgar

- Land transport
